PLANTS AND TREES

FOR ALL CLIMATES AND ALL COUNTRIES

REASONER
BROTHERS

ONECO
FLORIDA

THIS list is for florists, nurserymen and dealers only, and prices quoted are net. Pruning (where necessary or advisable) is always properly done by experts before packing, and **this work and packing also are entirely free**.

Our stock is immense in quantity and excellently grown. Our peculiar climate and soil are especially suited to the production of a fine class of plants without fire-heat, and florists have found our pot-grown plants much **more vigorous, better-rooted and healthier** than those produced in a cold climate in a hothouse. The same holds good for plants and trees in the open; our light, sandy soil causes a **heavy, fibrous root-growth**, rendering transplanting certain and easy.

Our packing is a special source of pride. We ship to all the states and territories, Canada, West India Islands, Mexico, Central America, South America, South Sea Islands, Europe, Asia, Africa and Australia continually, and **very seldom** get a report of any loss. Goods are put up **carefully, without extra weight**, and with due regard to climatic conditions.

A catalogue of our entire stock will be sent on request. We issue the neatest and most unique list of plants in America, well illustrated and all plants described accurately.

Usual conditions of sale: Not less than six at dozen rates, or 40 at one hundred rate, or 400 at 1,000 rate. Everything labeled. Terms cash from unknown correspondents. If time is desired, please write us and give reference. If shipments are wanted C. O. D., remit at least a quarter of the plants' value.

Plants by mail. Small and medium-sized plants may often go by mail cheaper than by express. At the prices per single plant (when not too large,) we will send **postpaid**; at dozen and hundred rates the postage will be charged at actual cost; remit sufficient (say 20 per cent.) to cover this.

By Express. We pack very lightly, and advise using this mode of shipment for small orders. If prepayment of charges is desired, do not fail to remit a sufficient sum. To distant points, under Section D they may be sent prepaid at eight cents per pound. The soil will be removed in whole or in part, as the nature of the plants will allow.

By freight. Where stock is heavy and in considerable quantity we shall ship this way. It is generally safe enough, but we shall of course use our judgment.

If you have never purchased plants of us, we ask a trial. Their unusual vigor and size will please you. Do not forget our address and that **we are headquarters** for new and rare plants from all over the world. Read the list of introductions as recorded **yearly** in the proceedings of the Society of American Florists and Ornamental Horticulturists.

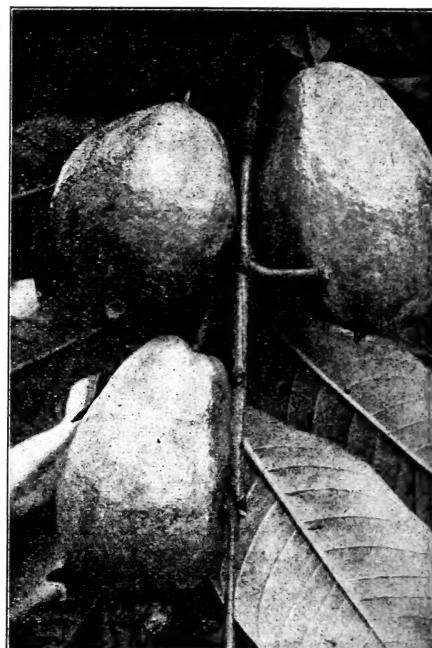

Special prices on large quantities a matter of correspondence. We are in a position to make extremely low prices for plants by contract and shall be pleased to hear from you.

We aim to treat all our customers as our friends, and our guarantee of complete satisfaction has no limit. We are always ready to cheerfully correct any error.

**REASONER BROTHERS,
Oneco, Florida.**

PHOENIX RECLINATA.

Our palms are given more space and sunshine than they receive in ordinary greenhouses, hence are better rooted and more vigorous.

"The fifty large Palms sent me by freight April 23rd, arrived June 1st, in fine condition, and were packed in first-class shape. I presume they would have stood many days more without injury."—Thurston H. U. Smith, Florist, Denver, Colorado, June, 1904.

TESTIMONIALS.

"Plants you sent, at different times, were very satisfactory." Joseph Pfingstl, Florist, Montgomery, Ala., March 25, 1904.

"Today I send an order for some more plants. I have several I ordered from you sometime ago, and they were so fine and large for the money that I send again."—Mrs. R. L. O'Neal, Huntsville, Ala., March 21, 1904.

"The palms and ferns arrived in perfect condition a week ago, and are now doing finely. I am much obliged for your selection and for the care you bestowed upon them." Kirk Munroe, Cocoanut Grove, Fla., Aug. 28, 1904.

"Plants received in splendid condition. It is a pleasant relief to plant lovers' eyes to see such strong and healthy plants, in contrast to the small weak ones from the northern greenhouses." Geo. Rothermel, San Jose, California, March, 1903.

"We have received your plants in good shape." (Refers to an immense lot of bananas and crape-myrtles used so freely about the grounds of the World's Fair and greatly admired through the season.)—Geo. E. Kessler, World's Fair Landscape Architect, St. Louis, Mo., May 16, 1904.

FOLIAGE AND DECORATIVE PLANTS

Many of these are valuable for bedding out in summer in temperate climates, and almost all succeed along the Gulf coast and California, even if nipped occasionally by frost. All do well under glass at the North, and some are favorite house plants. The large sizes will do for stock plants to propagate from.
